Angie,

We can attach this email to document status of the environmental permit. DOTD does not see renewal or extension as an impediment to moving the project forward. Thanks!

Sincerely,

Kim Golden

Good morning Kim,

Yes, you can use this email if it will be helpful. If the permit cannot be renewed or extended then we will do the full reprocessing as mentioned in the letter.

Cathy

Good morning Cathy,

Thank you. May I use this email as supporting documentation for the status of the permit? I think the concern is because the last renewal specifically said it would not be renewed.

Another thought - Does it matter that we started and completed the clearing and grubbing and did the demo before the permit expired? Wouldn't that mean we triggered the permit and it's in effect, doesn't expire, doesn't need renewal?

Sincerely,

Kim Golden

Good morning Kim,

I have been looking at this with Environmental. We have applied for a new extension or if that is not possible we will renew the permit. I do not believe we have received anything yet, but Environmental's experience is that the status of the permits is not a factor in consideration for the grant.

Good afternoon Cathy,

Any update regarding the extension of the environmental permit? See your email below. The RAISE application is due Monday, July 12. We are trying to get everything ready to upload tomorrow, if possible. Please let me know what you know about the extension. Thanks!

Sincerely,  
Kim Golden

Good morning,

This EIS was re-evaluated in 2019 (see attached). We requested an extension at that time and don't seem to have received a response. We are checking.

Good afternoon Cathy,

We are writing for the 2021 BUILD grant for the Kansas Lane Extension Project. Attached are all the environmental permits we can find. The permit from the Corps of Engineers appears to have expired on August 31, 2020. I thought we had talked about this at some point but I can't remember. Is there an extension of this permit? Does it matter that we started the Clearing & Grubbing project H. 013937 on 12.9.2019? I know you are on top of the Environmental stuff. Can you please help me connect the dots on this one? Thanks as always.

Sincerely,  
Kim Golden, P.E.

Kim,

These are the documents I had from last year's application.

Can you make sure that we have the updated versions? Also if there are other permit/environmental related documents for this project?

Thanks  
Angie
